Benchmarking the Tier 1 MSOs

In this report we compare the five Tier 1 MSOs across sales metrics, profitability, cash flow, debt leverage, and tax debt. Green Thumb and Trulieve continue to stand out on the positive side, while increased debt leverage and negative cash flow are growing concerns with Curaleaf.

We are publishing this report for FactSet compilation purposes. See appendix for our estimates on the company, and for valuation multiples. Our benchmarking analysis is based on 1Q25 results.

Top Line Trends

Curaleaf was the worst performer, with domestic sales down 8% qoq vs Trulieve (-1%). Wholesale accounts for about a third of sales and Cresco and Green Thumb. At the latter, we calculate own brands account for 90% of its retail revenues.

- Of the Tier 1 MSOs, Curaleaf, Trulieve, and Green Thumb led the group with revenues of \$310Mn, \$298Mn, and \$280Mn. But if we strip out International for Curaleaf, that MSO would have been #3 (\$275Mn). Verano was #4 with \$210Mn and Cresco has \$166Mn.
- In terms of seq growth, all reported a seq drop, with Trulieve the most resilient at -1% vs. Verano -4%; Green Thumb -5%; and Cresco and Curaleaf -6% (-8% for domestic sales). In yoy terms, Cresco was down 10%, Curaleaf -9% (-14% domestic), Verano -5%, Trulieve 0%, and Green Thumb +1%.
- In terms of reliance on net wholesale (a sign of brand portfolio strength and capacity), 33% of Cresco's revenues came from net wholesaling; Green Thumb 29%; Curaleaf 20% (domestic); Verano 20%; Trulieve 5%.
- Only Green Thumb and Verano disclose gross wholesale (the other three do not). Based on their disclosure, we calculate that 90% of Green Thumb's total retail sales came from its own brands (75% in CY23 and 63% in CY22), compared with 46% at Verano (41%; 33%). We do not have data to calculate this ratio for the other three MSOs (they do not disclose intersegment eliminations).
- Retail vs. net wholesale growth. At Verano retail sales fell 3% vs. and net wholesale was down 6%; Green Thumb -5% vs. -4%; Cresco -5% vs. -7%; Trulieve -1% vs. 0%; Curaleaf domestic -7% vs. -14%.

Profitability Trends

All MSOs ex Trulieve saw hefty drops in EBITDA margins qoq (-170bp qoq at least, vs. -30bp for Trulieve). Trulieve also continued to report the highest EBITDA margins. We believe this reflects the above average margins of the FL market, and supposedly increased price competition in the state, not having a significant impact on Trulieve.

- More vertically integrated models tend to carry higher margins. Trulieve had the highest gross margins in 1Q25 at 61.5% (-60bp qoq) vs. Green Thumb 51.3% (-240bp); Curaleaf 50.1% (+260bp); Verano 47.5% (-18bp); Cresco 47.4% (-40bp).
- The cash SGA to gross profit ratio was highest at Verano (85%) vs. Cresco 74%; Green Thumb 70%; Curaleaf 69%; Trulieve 65%.
- Adjusted EBITDA margins (methodologies can vary across MSOs) were 36.7% at Trulieve (-30bp qoq; +120bp yoy); Green Thumb 30.5% (-270bp qoq; -230bp yoy); Verano 25.9% (-290bp qoq; -420yoy); Cresco 21.9% (-170bp; -790bp); Curaleaf 21% (-170bp; -180bp).

Cash Flow Trends

Greem Thumb has the best adjusted OCF/EBITDA conversion in the group, and it also has the highest capex ratio, which we see as a sign of its growth potential.

- Reported operating cash flow was highest at Green Thumb (\$74.2Mn), compared with Trulieve \$50.7Mn, Curaleaf \$40.2Mn, Cresco \$6.5Mn, Verano \$1.8Mn.
- However, we should adjust OCF for the increase in income tax debt (which in some cases can be temporary, and or a reflection of a company's policy re 280e) to make the numbers comparable. Tax debt increased qoq by \$56Mn at Trulieve vs. Curaleaf \$49Mn, Green Thumb \$31Mn; Cresco \$17M; and -\$11Mn at Verano.
- So adjusted (and comparable) OCF would have been +\$43Mn at Green Thumb compared with Verano +\$13Mn; Trulieve -\$5Mn; Curaleaf -\$9Mn; Cresco -\$11Mn
- For the two generating positive adj OCF, the adj OCF/EBITDA conversion ratio would have been at 51% at Green Thumb (\$43Mn/\$85Mn) vs. 24% at Verano (\$13Mn/\$54Mn). As mentioned above, adjusted OCF was negative at the other three tier 1 MSOs.
- We see increases in capex and capex/sales ratio as a leading indicator of a company's growth prospects (or their views about them). At Green Thumb capex/sales was 11% in 1Q25 (vs. 7% for CY24), compared with 7% at Verano (11%); Cresco 7% (7%); Trulieve 6% (10%); Curaleaf 5% (7%).

Financial Net debt

Green Thumb is the least geared tier 1 MSO, while Curaleaf has the highest debt load (net debt to EBITDA) relative to this group. That said, Cresco has the highest ratio of net interest expense to sales.

• In terms of cash on the balance sheet, Trulieve had \$329Mn; Green Thumb \$210Mn; Cresco \$162Mn; Curaleaf \$122Mn; Verano \$84Mn.

- But Trulieve has \$618Mn in gross debt, for net debt of \$289Mn; Curaleaf \$776Mn, for net debt of \$654Mn; Cresco \$482Mn, for net debt of \$320Mn; Verano \$421Mn, for net debt of \$336Mn; Green Thumb \$252Mn, for net debt of \$42Mn.
- So, relative to sales (1Q25 annualized), the least geared tier 1 MSO is Green Thumb at 4% (net debt to annualized current sales) vs. Trulieve 24%, Verano 40%, Cresco 48%, and Curaleaf 53%. Relative to adj EBITDA, the ratios are: 0.1x at Green Thumb; Trulieve 0.7x; Verano 1.6x; Cresco 2.2x; Curaleaf 2.5x.
- In terms of the cost of debt, net interest expense to sales was 9% at Cresco vs. Verano 6%, Curaleaf 5%, Trulieve 4%, Green Thumb 1%.

280e Tax Debt

Other than Green Thumb, the other tier 1 MSOs have taken the view that 280E should not apply to them (most other MSOs have followed this standard), and have started provisioning income tax debt as a normal corporation. Their view is that this will be eventually litigated, that it may be settled for cents on the dollar (if at all), and that it does not have a set maturity date (i.e., it could drag on for >5 years). If they are right, could perhaps Green Thumb be putting itself at a strategic disadvantage? On the flip side, the tax debt risk should be considered in any investment analysis of MSOs.

If we take ST income tax liabilities plus long-term tax liabilities (in most cases called "uncertain tax provisions, or positions, or benefits), total tax debt as of 1Q25 was,

- Trulieve \$\$501Mn; Curaleaf \$464Mn; Verano \$319Mn, Cresco \$139Mn; Green Thumb \$32Mn.
- So, if we add tax debt to financial net debt, the total debt to sales would 90% at Curaleaf; Verano 78%; Cresco 69%; Verano 66%; Green Thumb 7%.
- Relative to EBITDA, the ratios would be 4.3x at Curaleaf vs. Cresco 3.2x, Verano 3x, Trulieve 1.8x, and Green Thumb 0.2x.

Appendix III: Bio and Disclaimers

Analyst Bio

Pablo Zuanic is a well-known and highly rated equity analyst following the broader cannabinoids (THC cannabis, hemp derivatives, CBD) and consumer sectors. Over the past six years he has launched coverage of over 40 companies in the US, Canada, and overseas; plant-touching as well as service providers (tech; finance); and has also worked with several private companies. He follows closely the reform process in the US, Canada, Germany, Australia, and elsewhere, and relies on a fundamental and data-driven approach to keep track of sectoral trends. His firm Zuanic & Associates publishes equity research, both from a macro/sectoral level in a thematic manner, as well as on listed stocks. The research service is aimed at institutional investors, corporations, and regulators. The firm is also available for short-term consulting and research advisory projects. Approaching the third year since its inception, the firm has collaborated with over 25 companies (in North America and overseas; plant touching and service providers; public and private), both on an on-going basis as well for specific projects. At various points in his career, Pablo Zuanic was ranked in the Institutional Investor magazine surveys and was called as expert witness in industry investigations. He has a deep global background having covered stocks over the past 20 years in the US, Europe, Latin America, and Asia, across consumer sub sectors. Prior employers include JP Morgan, Barings, and Cantor Fitzgerald. An MBA graduate of Harvard Business School, he started his career as a management consultant, which brings a strategic mindset to his approach to equity research. *He can be contacted via the company's portal <u>www.zuanicassociates.com</u>; via email at <u>pablo.zuanic@zuanic@zuanicgroup.com</u>; or via X @4200dysseus.*

Disclosures and Disclaimers

About the firm: Zuanic & Associates is a domestic limited liability company (LLC) registered in the state of New Jersey. The company's registered address is Five Greentree Centre, 525 Route 73, N Suite 104, Marlton, New Jersey 08053, USA. Pablo Zuanic is the registered agent. The firm publishes equity research on selected stocks in the cannabis and psychedelics sector, as well as thematic macro industry notes. The firm also provides consulting and advisory services. Potential conflicts of interest are duly reflected in the respective specific company reports.

Analyst Certification: The publishing analyst, whose name appears on the front page of this report, certifies that the views expressed in this independent research report accurately reflects his personal views about the subject securities or issuers discussed in this report. His opinions and estimates are based on his best judgement at the time of publication and are subject to change without notice. As per the company's policy, the author of this report does not own shares in any company he covers.

Other: This report is for use by professional and or institutional investors only, and it is deemed impersonal investment advice, published on a bona fide and regular basis. This report is for informational purposes only and is based on publicly available data believed to be reliable, but no representation is made whether such data are accurate or complete. As such, this report should not be regarded by its recipients as a substitute for obtaining independent investment advice and/or exercise of their own judgement. When making an investment decision this information should be viewed as just one factor in the investment decision process. Neither the publishing analyst, nor any of the company's officers and directors, accept any liability for any loss or damage arising out of the use of all or any part of the analyst's research.

Risks: The financial instruments mentioned in this report may not be suitable for all investors and investors must make their own investment decisions based on their specific investment objectives. Past performance should not be taken as an indication or guarantee of future performance. The price, value of and income from, any of the financial instruments featured in this report can rise as well as fall and be affected by changes in political, financial, and economic factors. If a financial instrument is denominated in a currency other than the investor's currency, a change in exchange rates may adversely affect the price or value of, or income derived from, the financial instrument, and such investors effectively assume currency risk.

Disclosure: Z&A offers advisory and research services and is often engaged on an ongoing or ad hoc basis by various operators in the industry.

Copyright: No part of this publication may be reproduced, distributed, or transmitted in any form or by any means, including photocopying, recording, or other electronic or mechanical methods, without the prior written permission of the author.
